Tony Constantineau Founder – Résidences Boutique

The figures for La Villa du Chasseur are not the result of chance.

The 50% occupancy rate and the real revenues generated from it, is consistent across the entire Résidences Boutique portfolio.

This is not an optimistic projection. It is our actual performance, year after year.

This performance is built on a rigorous methodology, developed and refined over time

- Selection of locations with strong tourism potential
- Architectural design conceived to maximize the guest experience
- Construction delivered with high standards of excellence and controlled costs
- Interior design that positions each property in the premium segment
- A marketing strategy designed to optimize revenue throughout the year

Acquiring a Résidences Boutique chalet is not simply purchasing a property. It is investing in a unique expertise, built over more than fifteen years, one that transforms a real estate asset into a source of income, making it possible to turn pleasure into an investment.
